Upload Your i>clicker Polling Data

(adapted from i>clicker v7 Gradebook Integration: Blackboard Learn Instructor Guide page 18-19)
updated 9-1-2015

After you have polled your students in class, your polling data will appear in the i>clicker gradebook. You can view students’ points, adjust scores, delete questions, synchronize registrations and export/upload student polling data into your LMS gradebook.

To upload i>clicker scores into your Blackboard gradebook:

1. Launch i>clicker, select your course and click Open Gradebook.

2. From the Gradebook main window, select Sync Scores.
3. From the Upload Scores to LMS window, select the session(s) you wish to upload and click Next.

4. Specify session data details then click the **Upload** button.

6. A confirmation message appears once your data is uploaded. You can now view the scores in your Blackboard course Grade Center (go to **Control Panel > Grade Center**).
