Overview

i>clicker v6.1 provides you the convenience of downloading a class roster from your Course Management System (CMS) rather than creating a roster from scratch. We recommend this option if you use a CMS to post your course grades.

The following sections walk you through the steps for downloading a course roster from your CMS, registering student remotes, and exporting polling results for use with your CMS.
Create a Course

You will need to create a course and change your course settings in \textit{i>clicker} prior to downloading a course roster from your CMS.

To create a course and change your course settings:

1. Double-click the \textit{i>clicker} icon to start the program.

2. The \textit{Welcome to i>clicker} window appears with no courses listed. Click \textbf{New}.

3. A \textit{New Course} window appears. Enter your \textbf{Course Name}, \textbf{Course Number}, and \textbf{Section Number}. This combined information will serve as the unique identifier for your course.

4. Click \textbf{Create}. \textit{i>clicker} automatically creates a new course folder in your \textit{iclicker Win\Classes} or \textit{iclicker Mac:Classes} folder. The \textit{New Course} window closes and you are returned to the \textit{Welcome to i>clicker} window where you will see your course name in the list of courses. Select your course and click \textbf{Choose}.

5. The \textit{i>clicker Home Page} appears. Click the \textbf{My Settings} button.
6. The My Settings window appears. Click the CMS/Registration tab and select your course management system from the Course Management System list.

7. Click Set for Course. You will receive an alert reminding you to download your CMS course roster before trying to export your student results from i>grader. Click OK. You will export your course roster in the next section.

8. Close i>clicker.
Exporting a Blackboard CE Course Roster

Once you have created a course in i>clicker, you can download a course roster from your CMS and add it to your i>clicker class folder.

To download/export your Blackboard CE course roster:

1. Log into Blackboard and select the course for which you are using i>clicker from the **Course List**.

2. In the left panel, under Control Panel, select **Evaluation > Grade Center**.

3. In the Grade Center select **Work Offline > Download**.
4. Select the following options:
   - Select Data to Download: **Full Grade Center**
   - Delimiter Type: **Comma**
   - Include Hidden Information: **No**
   - Download Location: **My Computer**

1. Click **Submit**.

2. The Download Grades page appears. Click the **Download** button.

3. Save the file into your Classes folder within your iclicker Win or iclicker Mac folder (e.g., `iclicker Win\Classes\Sample Physics Course` or `iclicker Mac:Classes:Sample Physics Course`). When saving the file you must change the filename to `gb_export.csv`.

NOTE: If you do not see your course folder in the iclicker Win\Classes or iclicker Mac:Classes folder, complete steps 2-7 under Create a Course above.

TIP: We recommend that you open the CSV file to make sure the file includes: student last name, student first name, and student Blackboard ID (If you open the file, close it without saving). The information should appear correctly when you select Full Grade Center but it is best to double-check your downloaded file to avoid confusion. IMPORTANT: Once the file has been downloaded, do not modify the CSV file as it will make the file format unreadable by i>clicker.
Registration Options

Students must register their i>clicker remotes before you synchronize your CMS class roster. i>clicker offers a couple ways to register remotes.

Web Registration (Option 1)

Online registration is recommended, especially for classes of fifty students or more. To register online, send your students to iclicker.com and have them click the Register Your i>clicker button.

To complete the student registration form, students must:

1. Enter their first name and last name in the appropriate fields.
2. Enter their student ID (student should enter their CMS usernames as their student ID).
3. Enter their i>clicker remote ID. The remote ID is the 8-character alphanumeric code printed below the barcode on the back of their remote.
4. Enter the letters or numbers in the captcha security image on the screen. This verification image is a slightly distorted series of characters used to prevent spam bots from submitting the form. Students can request another image if they find the first hard to see, or play an audio reading of it instead.
5. Click the Enter button. An on-screen message confirms that registration was successful. The student’s ID is now tied to their unique i>clicker remote ID.

After your students have registered online, you need to synchronize i>grader to update the information in your class folder (see Synchronizing Web Registrations).
your i>grader application. Students must vote at least once in class. We recommend that you ask at least one clicker question, such as an attendance or ice-breaker question, on the first day of class in order to capture remote IDs before requiring your students to register.

TIP: Students can use a single i>clicker remote for multiple classes and only need to register on the web once. If a student makes a registration mistake they can simply register a second time.

In-Class/Roll Call Registration (Option 2)

This registration option is only recommended for small classes with fewer than 50 students. The two registration options (Web and Roll Call) can also be used in combination.

To use Roll Call Registration:

1. From the i>clicker Home Page, click the Start Session button to start a session.

2. The i>clicker Session Toolbar appears. Click the Options button 📋.

3. Select the Roll Call Registration menu option. The roll call window appears.

4. Instruct students to press the letters on their i>clicker remotes that correspond to the letters in the columns to the right of their names in the Register Now window. The letters must be pressed in left to right sequence.

5. When a remote is registered, the remote ID appears next to the students name/ID (e.g., 90B, Song, Patrick, #1A081909B).

6. When registration is complete, click Close to end the registration.

The registration window will continue cycling through the student names until all registrations are complete or you decide to close the registration window.

You can control the speed at which your students’ names appear by changing the number in the Allow ___ seconds for viewing option in the bottom right corner. You can also change the student information that displays on screen in the My Settings, CMS/Registration tab. (You must close the Roll Call Registration window before changing the student information.)

NOTE: The student list will change to green and yellow five seconds before students names disappear. This gives students warning that a new batch of names is about to be displayed. It is best for students to wait until their names appear again rather than try to register when the screen is green and yellow.

TIP: Students that accidentally register their clicker to the wrong name should press DD to clear the incorrect registration and restart their registration process.
Synchronizing Web Registrations

Once your students have registered their remotes, you can use i>grader to synchronize your course roster.

**NOTE:** You must be connected to the Internet to synchronize web registrations.

To synchronize web registrations:

1. Click the **Sync...** button in the bottom right corner of the *i>grader Home Page*.

   ![i>grader Home Page with Sync... button](image)

2. A **Synchronize Web Registrations** window appears with a description of the synchronization function. Click **Continue** to proceed.

3. *i>grader* synchronizes your roster information with your students' online registrations. After synchronization is complete, click **Close** to return to the *i>grader Home Page*.

   If an inconsistency between your roster and the web registrations exist, you will be prompted to resolve it before synchronization is completed. The software will alert you to any discrepancies between your roster and the web registrations. Your choices for resolving registration conflicts include:

   - **Ignore:** no registration information is associated for that particular student.
   - **Accept:** allows the student ID to be included in *i>grader* and associates the student with the correct remote ID.
   - **Cancel:** exits the registration process and leave *i>grader* unchanged.

**Example:** A student registers his *i>clicker* online, entering remote ID 143B436C and student ID 67-890. Upon synchronizing, you are notified that this student’s student ID does not match any record in your roster file. You realize that the student has both mistyped his last name and entered the student ID in a slightly different format from the student ID in your roster file (with a dash in the middle). Because you can be reasonably sure that this is the correct student, you select his name from the list of students in the roster and click the **Accept** button. This action associates the correct student ID 67890 with *i>clicker* remote ID 2796B1.

**TIP:** Students can register multiple times without affecting the synchronization process. If you are unsure if a web registration matches the student's roster, you can always ignore the registration, ask your student to register online again, and run another web synchronization process at a later time.

Any unregistered clicker IDs that remain after this step (i.e., you continue to see records with red clicker ID numbers), likely belong to students who have not yet registered online. Check with your students and synchronize again later. If there are problems synchronizing only one or two students who have registered online, you can also run a *Roll Call registration* or register these students manually. You can repeat these steps as often as necessary.

**TIP:** We suggest setting a deadline, no matter how loose or long, for web registration. An end date will allow you to confirm all students are registered and assist you with classroom and *i>clicker* management.
Uploading grades from i>grader into Blackboard 9

To upload grades into Blackboard 9:

1. When you are ready to upload your i>clicker polling data into Blackboard, open i>grader. Make sure the Output formatted for: text in the bottom right corner lists Blackboard. Click Export.

2. The Select session to be exported window appears. Click the checkbox(s) next to all sessions that you want to export or click Select All.

3. The student scored are saved in your course folder, within the Classes folder in a file called Uploadfile.csv (e.g., iclicker Win\Classes\Sample Physics Course\Uploadfile.csv or iclicker Mac:Classes:Sample Physics Course:Uploadfile.csv).

   **NOTE:** Only one Uploadfile.csv can exist in your course folder at once. If you wish to export data into more than one file during a single i>grader session, you will need to move or rename the previously created Uploadfile.csv before exporting a different selection of sessions. When you no longer need the information in the exported file, you may leave it in your course folder and it will simply be overwritten the next time you need to export.

4. Log into Blackboard (and into your course) and go back to Grade Center (Control Panel > Evaluation > Grade Center).

5. Locate and select Work Offline > Upload.

6. Click the Browse button next to Attach local file option and find the UploadFile.csv file in your course folder (e.g., iclicker Win\Classes\Sample Physics Course or iclicker Mac:Classes:Sample Physics Course). Select UploadFile.csv and click Open. It will appear in the Attach local file field next to the Choose File button. Click Submit.
7. On the Upload Grades Confirmation page, you will see a list of the i>clicker assignments under the heading **Uploading Column** (note that if you’ve exported a single session from i>grader, there will only be one item under this heading). Select the assignments you want to upload by clicking the checkboxes next to the session title. Click **Submit**.

8. Once you click **Submit**, the main Grade Center page will open with an upload status. If the upload was successful, your students’ polling data will now be available in the gradebook. Complete steps 1-5 to add more assignments.
Additional Support

The i>clicker team is committed to the successful use of i>clicker in your classroom. In addition to this User Guide, we have many support options available. Please don't hesitate to contact us with any questions or concerns that you have regarding i>clicker.

For additional support, visit iclicker.com.

To schedule live training, visit http://iclicker.webex.com and sign up for a training session where we review the software in its entirety. Or email us at sales@iclicker.com to schedule a session.

If you have a specific technical question and need help, email us at support@iclicker.com or call us toll-free at 866-209-5698.
